17. PGA TERMS AND CONDITIONS

17.1 Billing Adjustment

(a) Application

The rates for all gas sales services and Rate Schedules RTS, SGTS1, SGTS2, SGTS3, UGLTS and BBS, other than Optional Alternate Fuel Displacement sales under Rate Schedule LGS1/LGS2 and Rate Schedule PDS, shall be increased or decreased by an amount hereinafter described as the Purchased Gas Adjustment Factor (PGA).

(b) Definition of "Purchased Gas"

The term "purchased gas" as used in determination of the PGA shall include, but not be limited to, the following sources of gas, including related transportation, storage, handling costs required for delivery to the Company's facilities, and all costs associated with the purchase and sales of gas price hedging futures contracts applicable to: 30% of the Company's forecasted non-storage normal winter demand (December through February), commencing with the 2013-2014 Winter Season and continuing through the 2016-2017 Winter Season, of its Customers that pay the PGA/ACA, as determined at the outset of each hedging purchase period, pursuant to the Company's Gas Price Hedging Plan:

- (i) Natural and substitute natural gas (SNG) and liquefied natural gas (LNG) and renewable natural gas from pipeline and other suppliers including exchange gas;
- (ii) LNG from other than pipeline sources;
- (iii) Liquefied petroleum gas (LPG); and
- (iv) Other hydrocarbons used as feedstock for production of SNG and spot or emergency purchases.

17.2 Computation of Firm PGA

The PGA, calculated to the nearest \$0.001 per Dth, shall be computed each quarter for firm sales Customers under Rate Schedules RS, SGS1, SGS2, SGS3, UGLS and MPS and to the nearest \$0.0001 per Dth for firm customers under Rate Schedule LGS1/LGS2 in the following manner:

(a) Base Cost – Firm Rate Schedules

The base cost of purchased gas applicable to each of the Company's firm sales rate schedules is as follows:

Rate Schedule	Demand (per Dth)	Commodity (per Dth)	Total Base Cost Of Gas (per Dth)
RS, MPS	\$ 3.4330	\$ 3.5930	\$ 7.026
SGS1/SGS2/SGS3, UGLS	\$ 2.5830	\$ 3.5930	\$ 6.176
LGS1/LGS2	\$ 0.4780	\$ 3.5930	\$ 4.0710
SS1/SS2	\$ 0.4780	\$ 3.5930	\$ 4.0710

GENERAL TERMS AND CONDITIONS  
ALL RATE SCHEDULES  
(continued)

(b) **Base Cost - Combined Firm Sales Rate Schedules**

The base cost of purchased gas applicable to the combined total sales for the firm sales rate schedules in 17.2(a) of this section is **\$6.6840** per Dth. This is the sum of the demand cost of **\$3.0910** and the commodity cost of **\$3.5930**. The base cost of purchased gas for RTS, SGTS1, SGTS2, SGTS3, and UGLTS is **\$2.754**.

(c) **Calculation of Firm PGA – Sales**

The PGA for all firm sales rate schedules shall be determined as follows:

- (i) For estimated quantities purchased as specified in Section 17.1(b)(i), the annual billing demands and the quarterly commodity purchases for firm sales rate schedules will be priced at the estimated wholesale rates of the Company's suppliers. For the purposes of calculating the firm PGA, Gas Inventory Charges (GIC's) and other similar charges from the Company's pipeline suppliers will be considered as a demand cost of gas. For purposes of the interruptible PGAs, such charges will be considered as a commodity cost of gas.
- (ii) The estimated quantities of all other types of gas or hydrocarbons purchased as specified in Section 17.1 (b)(ii), (iii), and (iv), for firm sales rates schedules during the billing quarter will be priced at the respective prices at which such quantities were charged to expense accounts on the Company's books. These purchases will be included with the commodity charges in Section 17.2(c)(i).
- (iii) The sum of commodity amounts determined in Section 17.2(c)(i) and (ii), carrying costs on gas storage balances, and applicable billing adjustments, will be divided by the projected firm Dth sales, less any sales related to applicable billing adjustments, for the billing quarter to determine the quarterly commodity cost per Dth. Carrying costs on gas storage balances for the Firm PGA-Sales will be based on allocated average storage balances for the billing quarter multiplied by the overall rate of return, as determined in its most recent rate case, including the authorized return on common equity, plus an allowance for income taxes.
- (iv) The sum of demand amounts determined in Section 17.2(c)(i) and (ii), and applicable billing adjustments, less any demand costs directly assigned to rate schedules or Customers, other than those directly assigned the Choice Program, will be divided by the projected firm Dth sales, including quantities transported under rate schedules RTS, SGTS1, SGTS2, SGTS3, and UGLTS, less any sales related to applicable billing adjustments, for the billing quarter to determine the quarterly demand cost per Dth.
- (v) The sum of amounts determined in Section 17.2(c)(iii) and (iv) for separately computed demand and commodity amounts will be the current cost per Dth of gas purchased for sales under applicable schedules (Current Cost).

ACCEPTED FOR FILING  
PUBLIC UTILITY REGULATION  
STATE CORPORATION COMMISSION  
NOV 20 2023

ACCEPTED FOR FILING  
PUBLIC UTILITY REGULATION  
STATE CORPORATION COMMISSION

NOV 20 2023

GENERAL TERMS AND CONDITIONS  
ALL RATE SCHEDULES  
(continued)

- (vi) The Current Cost determined in Section 17.2(c)(v) will be adjusted to provide for the recovery of uncollectible accounts expense by multiplying the Current Cost times one plus the uncollectible accrual rate used to establish base non-gas rates in the Company's most recent rate proceeding.
- (vii) The PGA shall be the difference between the base cost set forth in Section 17.2(b) and the current cost determined in Section 17.2(c)(vi).

**(d) Calculation of Firm PGA – Choice Program**

The PGA for rate schedules RTS, SGTS1, SGTS2, SGTS3, and UGLTS shall be determined as follows:

- (i) The unit demand cost of firm capacity, as calculated in Section 17.2c(iv), minus
- (ii) The weighted average unit demand cost of capacity offered for assignment in the Choice Program, plus
- (iii) Variable storage costs, minus
- (iv) The base cost set forth in Section 17.2(b).

**(e) Annual Roll-In**

Effective with the December billing month of each year, the base cost of gas shall be revised to reflect the cost of purchased gas as determined in Sections 17.2(c)(v), excluding carrying costs on gas storage balances, and 17.2(d) for the 12 months ended August of that year, which base cost of gas shall be effective through the November billing month of the following year. Concurrently, the rates for monthly consumption set forth in all firm sales rate schedules as well as transportation rate schedules RTS, SGTS1, SGTS2, SGTS3, and UGLTS shall be revised to reflect an appropriately revised base cost.

**17.3 Computation of Interruptible PGA**

**(a) Base Cost - Interruptible Rate Schedules**

The base cost of purchased gas applicable to the combined total commodity sales for the interruptible sales rate schedules is **\$3.5930** per Dth.

**(b) Calculation of Interruptible PGA**

The PGA for all interruptible sales rate schedules shall be determined as follows:

- (i) For estimated quantities purchased as specified in Section 17.1(b)(i), the quarterly commodity purchases for interruptible sales rate schedules will be priced at the estimated wholesale rates of the Company's supplies.
